

Important Tips & Time Allocation for Last Day Revision

Try to reach home by 6pm, have food and take a nap of half an hour. Don't discuss anything with anyone. Don't entertain any thoughts regarding paper, best thing is to start thinking about audit.			
We have allocated time to each topic, time is scientifically decided as per number of hours we spend on topic in regular studies, you will observe that time is less, so don't go in-depth and don't venture in new areas.			
Use PM analysis file where all questions are sorted SA wise, topic wise, clause wise and all repeated questions are marked / 100+ Imp topics from Study Material & PM file from auditguru.in/downloads , preferably take print. So that you can see types of questions side by side.			
Use material which you have used for regular studies, its perfectly fine to quickly cover only those topics or chapters you know best.			
Its fine to use other books and notes covered only limited charts, questions which you find easy.			
For SAs and Other topics. I have given, key to remember, charts, shortcuts in our regular book for all bulky and important topics, use it.			
Try to cover all easy topics first, don't read line by line just revise orally, try to cover in short You can do your own ranking of topics and cover them as per your comfort			
In CA something or the other will be left out so don't worry, cover things which you know fast and then think about anything else, do new topics at last.			
Please stuck to time allotted, so that you can cover whole syllabus, if anything is left out use buffer time on 3rd day (120 min) to cover it.			
Don't study in last 2 hours have food, take nap, go early, do time pass and crack jokes with friends			
Get links of all videos and all PDF notes on auditing which are relevant for Nov 17 at one place for CA Final and CA IPCC. Amendments / Shortcuts / Paper Writing Pattern / IMPs / Test Paper etc https://goo.gl/EpX3Ec			
Topics	Min	Day & Time	Remarks
